OPIC CIPO

Trade-marks Journal

Vol. 63 No. 3194

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

GOODS

Control systems for electric generators for the conduction, distribution, transformation, storage, regulation and production of electrical energy; electric generators for the production of electrical energy; current generators; alternators, namely electric generators for converting mechanical energy to alternating current electricity; hand-held and stationary monitoring devices for measuring and inspecting electrical insulation in electrical systems; hand-held monitoring devices for evaluating insulation faults in electrical systems; residual electrical current monitoring systems for electrical systems, namely, residual-current devices and residual-current breakers with overload; electrical coupling devices for electrical systems, namely, voltage range-extenders for use with electrical insulation monitors; measuring current transformers; isolating transformers; transducers for measuring electrical voltage, electrical power consumption, electrical resistance, electrical capacitance, electrical current, electrical frequencies, phase angles, reactive and active power import, reactive and active power export, electrical voltage unbalances, electrical current unbalances, power displacement factors, power factors, total harmonic distortions, transients detection and flicker severities; electrical power supply units for providing emergency electrical power to electrical equipment; interface converters for the connection of a personal computer or handheld computing device to an electrical systems; electrical safety relays for measuring, monitoring and protecting against over/under current and over/under voltage conditions in electrical systems; hand-held and stationary electronic measuring instruments for measuring electrical voltage, electrical power consumption, electrical resistance, electrical capacitance, electrical current, electrical frequencies, phase angles, reactive and active power import, reactive and active power export, electrical voltage unbalances, electrical current unbalances, power displacement factors, power factors, total harmonic distortions, transients detection and flicker severities; electrical test devices and hand-held multi-meters for measuring and testing of electric and non-electric quantities of electrical circuits and electrical systems; electrical power supply units for providing emergency electrical power to electrical systems in hospital and medical environments; electrical components for monitoring, controlling and operating electrical power supply units for providing emergency electrical power to electrical systems; electrical commutators for switching an electrical circuit between two electric power sources in switchgear, controlgear and other electrical applications; operator panels, indicator panels and monitoring panels; computer hardware user interfaces and associated software applications for the evaluation, visualization and storage of electrical operating parameters and measured electrical values of electrical systems; ammeters; monitoring instruments for electrical current monitoring and measurement in electrical systems, monitoring instruments for electric switching, interruption analysis and fault analysis of electrical current and electrical insulation devices in electrical systems; monitors [computer hardware] for observation instruments and testing instruments; computers for current measurement, current monitoring, switching, interrupting and fault analysis of current and of the corresponding insulation devices; computer operating programs, recorded, for current measurement, current monitoring, switching, interrupting and fault analysis of current and of the corresponding insulation devices; computer hardware user interfaces for the evaluation, visualization and storage of electrical operating parameters and measured electrical values of electrical systems; computer programmes [programs], recorded, for current measurement, current monitoring, switching, interrupting and fault analysis of current and of the corresponding insulation devices; computer programs [downloadable software] for current measurement, current monitoring, switching, interrupting and fault analysis of current and of the corresponding insulation devices; computer software, recorded, for current measurement, current monitoring, switching, interrupting and fault analysis of current and of the corresponding insulation devices; detectors for detecting abnormalities in power consumption, in current and/or defects in insulation; electrical safety diagnostic apparatuses, namely, short circuiting and earthing kits, voltage detectors, electrical power testers, voltage regulators and temporary power distribution systems; electronic notice boards; resistances, electric; anti-interference devices for reducing electromagnetic interference in an electrical circuit; frequency meters; limit switches [electricity]; inductors [electricity]; integrated circuits; smart cards, namely hand-held integrated circuit cards for use in identification and security applications; electric collectors for conducting electrical current from a source electric circuit; electric comparators for comparing electric voltages and electric currents in electrical systems; testing jigs for testing printed circuit boards for electrical faults; optical electric measurement instruments for the measurement and observation of electric current and electrical insulation in electrical systems; radio pagers for passing on operating messages and alarm messages; switchboards; electrical commutators for reversing current direction in an electric switch; distribution consoles [electricity]; control panels [electricity], namely annunciators, socket panels, graphic panels, and housings therefore; switchgears, namely low-voltage safety switchgears for controlling, isolating and protecting electrical safety equipment; communication interfaces, signals and systems for the transmission transmitters of electronic operating and alarm signals; signalling panels, luminous or mechanical; electric voltage and current boosters, namely motor/generator sets for voltage regulation in electrical systems; voltmeters; current limiter; current rectifiers;
